

## JAM DATA MOBILE APPLICATION

The mobile application has been tested and is operational. Mobile application logo and colour scheme for user interface decided on and team were satisfactorily done. Data search modes were properly established and ordered, these being Goals, Sectors and Themes; along with sub groupings and indicators were mapped satisfactorily.

There were two issues of note considered and these are, the introductory Jam Data page edited and duplicate sentences removed. Secondly, the next step button “explore” was repositioned at the bottom right of the said page resized and highlighted.
